Profession:

(IT-) Project Manager (PM)

The intersection between team & client

Skills & Abilities:

- Critical thinking
- Attention to detail
- Ability to work under pressure
- Management skills

Educational Prerequisites:

Companies look for people to be project managers generally after 5-7 years of experience in the area of IT or computer technology. A certificate as a PMP (Project Management Professional) will definitely help your career prospects.

Alternatively, a MBA (Master of Business Administration, ca. 4 Semesters) would help further your prospects.

Job Details:

As a project manager you lead the entire team, including everyone that is a part of a project and are responsible for all of it. You have to make sure that everything is ready on time while keeping an eye on your budget at the same time. You act as the interface between your team and the customer in addition to being the one that controls costs. The IT-Project Manager is specifically responsible for the IT department. He will ensure the development of qualitative approaches are drawn up as well as paying attention to the software and programming timetable.

Future Opportunities:

As a project manager you can earn on average around 50.000 euros a year. You can rise to Chief Technology Officer (CTO) and make up to 240.000 euros a year.
